

# ICO White Paper Roadmap for DimsumAI Coin

## Executive Summary

**Vision:**

To leverage AI and advanced technologies to innovate the global food production industry, enhancing nutritional value and longevity, specifically designed for extreme conditions such as space travel. To revolutionize the food industry with AI-driven technologies, focusing on long-term food preservation and enhanced nutritional benefits tailored for challenging environments like space.

**Mission:**

To deploy AI-driven solutions in food technology, cryptocurrency advancements, and blockchain innovations, enhancing the capabilities of food preservation and financial technologies globally. Implement cutting-edge technologies in AI and quantum physics to create sustainable, nutrient-rich food solutions for future global challenges.

## ROADMAP

### Period #01 - COOKING (Foundation and Community Engagement)

- Website & Social Media Launch: Establish a robust online presence to serve as the primary information hub.
- Marketing and Community Building: Engage in targeted digital marketing campaigns to build a community around the DimsumAI ecosystem.
- PinkSale AMA: Conduct an interactive AMA session to address investor queries and increase project transparency.
- Private Call Group Features: Create exclusive groups for core supporters, offering early insights and benefits.
- TG & Twitter Raids: Engage with broader communities through planned social media activities to enhance visibility.
- Model14: Introduce the initial model of AI technology focused on food production efficiency.

### Period #02 - SERVE (Initial Offerings and Market Expansion)

- PinkSale Fair Launch: Execute a transparent and equitable token launch.
- Dexview and Dexscreener Trending: Utilize these platforms to ensure the token gains early visibility and traction.
- CMC / CG Listings: Aim for early listings on CoinMarketCap and CoinGecko to establish market credibility.
- Influencer Partnerships: Form strategic partnerships with influential figures in the food tech and crypto sectors.
- YouTube Reviews: Promote through YouTube influencers to tap into diverse audiences.
- Model15: Deploy the next iteration of AI models, enhancing quantum physics freezing technology.

### Period #03 – YUMMY (Scaling and Advanced Developments)

- PooCoin / Dextools Ads: Increase advertising efforts on prominent crypto advertising platforms.
- Partnerships with Blockchain Services: Collaborate or join forces with blockchain service providers to integrate advanced technologies.
- CEX and DEX Listings: Strive for token listing on major exchanges like Binance, Bybit, OKX, and Coinbase to enhance liquidity.
- YouTube Marketing: Continue aggressive marketing campaigns on YouTube to maintain engagement.
- Activity Contests: Organize community contests and activities to keep the ecosystem vibrant and interactive.

### Future Growth and Innovation (Technological Expansion and Global Impact)

- AI and Machine Learning Developments: Develop trading bots, and explore deep learning and machine learning applications in cryptocurrency.
- Quantum Computing and Cybersecurity: Advance quantum computing for crypto operations and enhance cybersecurity measures.
- Generative AI and Blockchain Integration: Invest in generative AI for creative crypto solutions and expand blockchain infrastructure.
- Global Expansion: Aim to hire a thousand developers globally within five years, fostering a large-scale development environment.
- New Projects and Growth Potential: Plan for 100 innovative projects that promise to expand the ecosystem with a potential for 1000x growth.
- Staking, DeFi, and Wallet Services: Develop a proprietary wallet, introduce staking programs, and integrate decentralized finance (DeFi) functionalities to boost token utility and investor returns.

## Milestones and Timeline

- Detail specific milestones: Include expected completion dates for each phase and major project milestones to give stakeholders a clear timeline.

## TOKENOMIC

### Token Allocation for DimsumAI Coin

Total Supply: 1,000,000,000 DIM (DimsumAI Tokens)

- Presale: 550,000,000 DIM (55%)
  - Seed Fund: 50,000,000 DIM (5%)
  - Strategic Sale: 150,000,000 DIM (15%)
  - Launchpad Sale: 350,000,000 DIM (35%)
- Liquidity: 280,000,000 DIM (28%)
  - Dex Liquidity: 180,000,000 DIM (18%)
  - CEX: 80,000,000 DIM (8%)
  - Reserve: 20,000,000 DIM (2%)
- Marketing: 90,000,000 DIM (9%)
  - General Marketing Activities: 70,000,000 DIM (7%)
  - Partner and Advisor: 20,000,000 DIM (2%)
- Foundation: 50,000,000 DIM (5%)
  - This fund is reserved for future development, unforeseen expenses, and maintaining the health of the overall project ecosystem.
- Founder and Team: 30,000,000 DIM (3%)
  - Allocated to compensate and incentivize the project's founding members and core team. This portion is typically subject to a vesting period to ensure long-term commitment.

## Usage of Funds

- **Research and Development (40%):** Focus on advancing AI technology for food production, including quantum physics freezing technology and stem cell research for enhancing food quality.
- **Operations and Infrastructure (20%):** Building robotic food production factories, scaling up operations, and maintaining high standards in production.
- **Marketing and Community Building (15%):** Funding marketing campaigns, community events, social media promotions, and partnership development.
- **Expansion into New Markets (10%):** Including entering new geographic and sectoral markets with AI-driven food technology solutions.
- **Legal and Regulatory Compliance (10%):** Ensuring compliance with global regulations regarding food production, cryptocurrency, and technology deployment.
- **Liquidity Management (5%):** Ensuring sufficient liquidity on exchanges to facilitate trading and stabilize the token price.

## Token Sale Phases

- **Seed Fund:** For initial backers who are willing to invest during the very early stages, offering them tokens at the most favorable terms.
- **Strategic Sale:** Targeted at strategic partners who will bring long-term value to the project beyond capital, such as technology partnerships, market access, or regulatory guidance.
- **Launchpad Sale:** Open to the wider public through a launchpad, providing a broader base of investors the opportunity to participate.

The above tokenomic model is designed to ensure that DimsumAI is well-funded and able to meet its ambitious goals. It balances the need for upfront capital with the need to incentivize the founders, team, and partners while also ensuring that enough liquidity is available in the market for the token to be traded effectively.
